Activity-2:

EI Reflection – The STOP Method

- **Trigger:** I faced an issue while deploying my project and accidentally deleted all the program files.
- **Emotion:** I felt confused, stressed, and worried about losing my work.
- **Reaction:** Initially, I panicked due to the sudden problem.
- **Action Taken:** I connected with my team, and Krishna helped me recover the deleted files.
- **Outcome:** The situation was resolved, and I felt relieved and gained clarity.
- **Reflection (STOP Method):** I could have responded better by stopping immediately, taking a deep breath, and calmly assessing the situation before reacting.
- **Challenge:** The hardest step for me was **"Stop"**, as I reacted quickly instead of pausing first.
